EDUCATION

University of Vermont - ***B.S. in Environmental Science***
Minor in Geospatial Technologies

Burlington, VT
May 2023

SKILLS

Professional: Intergovernmental Relations, Policy, Excel, Cartographic Design, Spatial Analysis, Environmental Assessment, Water & Wastewater Systems, Pollutant Analysis.

Technical: ArcGIS Pro, QGIS, AutoCAD, Civil 3D, JavaScript, Google Earth Engine, Remote Sensing, Automated Geoprocessing, Hydrologic Modeling, HTML/CSS, PHP, & SQL.

Language: Working proficiency in Spanish & Portuguese.

WORK EXPERIENCE

Legislative Aide

Boston, MA

Massachusetts House of Representatives

January 2024 - Present

- Managed and resolved 350+ constituent cases through data tracking, issue analysis, and interagency coordination.
- Supported the filing of 25+ legislative proposals through research, drafting, and stakeholder engagement.
- Produced communications, supervised interns, and coordinated daily office operations, improving public engagement and advancing district priorities.

Capstone Study

Moscow, VT

Stowe Electric Department

January 2023 - May 2023

- Developed a GIS-based restoration plan addressing erosion and invasive species along the Little River using DEM analysis in ArcGIS Pro to identify high-risk erosion zones.
- Applied aerial imagery and spatial analysis to delineate revetment zones for targeted bank stabilization.
- Used grant funding to procure materials and install 60 saplings, 5 fascines, and native vegetation as an ecological revetment for slope stabilization.
- Produced maps, diagrams, and presentation materials for stakeholders; project incorporated into utility's future planning materials.

RESEARCH EXPERIENCE

Research Assistant

Burlington, VT

NASA Land Cover Hackathon

June 2022 - July 2022

- Assisted in developing a land cover classification algorithm for imagery by labelling segments of over 50 images to support the automation of remote sensing workflows.

Ecological Wastewater Treatment System Comparative Study

Burlington, VT

Rubenstein School of Environment & Natural Resources

August 2022 - December 2022

- Collected and analyzed water quality data (pH, dissolved oxygen, temperature, nutrients) and reported findings to the design teams of each system.
